ZOOMING IN GRID VIEW

Need a closer look at someone’s video? Or do you want to see as many participants as possible? The zoom feature in Webex gives you control over how many videos you see. The grid view automatically adjusts to fit the number of people in the meeting (with a max of 25 on each scrollable page) and you can use the slider to see more, or less, videos as desired.

**Zoom out**

Move the slider to the left to zoom out and see more people with smaller videos.

**Zoom in**

Move the slider to the right to zoom in and see less people with larger videos.
